Chiropractic & Wellness

Dr. Lisa Bloomer, Doctor of Naturopathic Medicine

14845 Yonge St. Unit 4 Hunter's Gate Plaza

Aurora, ON L4G 6H8 (905) 727-6500

www.standrewschiro.ca info@standrewschiro.ca

Dear Parent,

This letter will confirm that your child has an appointment with Dr. Lisa Bloomer, Naturopathic Doctor on _____ at _____.

In order to best help you, I will need to know about your child's medical history. Please take a few moments to read this welcome package and fill in the questionnaires and the enclosed food diary. Please bring the completed questionnaires and food diary to your child's first appointment. These forms will be reviewed with you at your child's initial consultation, their concerns will be discussed, a complaint oriented physical examination will be performed if indicated and a treatment protocol is usually begun, depending on the complexity of your child's concerns and medical history. Initial Pediatric Naturopathic consultations are 1-1 ½ hours in length. Follow-up visits are 30 minutes in length.

If your address or daytime phone number changes before your initial appointment please notify me of the change. If you have any questions please do not hesitate to call my office at (905) 727-6500. Please allow 24 hours if it becomes necessary to cancel your child's appointment.

Directions: Directions: St. Andrew's Chiropractic & Wellness is located at 14845 Yonge Street, Unit 4 at the intersection of Yonge St. and Dunning Ave., in the Hunter's Gate Plaza.

INTRODUCTION TO NATUROPATHIC MEDICINE

Naturopathic Medicine is an exciting way of looking at health and wellness that takes its roots in many ancient healing traditions. One of the main principles of Naturopathic philosophy is treating the whole person; mind, body and spirit. In this way, we see health as the normal state in the body, which is easily influenced by our environment, our every day experiences and our emotions. The Naturopathic practitioner seeks to discover the underlying causes of illness, and rather than merely suppressing the symptoms of the disease we support the body and promote healing with various remedies and lifestyle changes. Our fundamental philosophy is to trust that within each person, when obstacles are removed, there is an innate ability to heal ourselves.

It follows then that there is much emphasis on self responsibility for health, prevention and patient education. Naturopathic Doctors do their very best to listen carefully to what their patient has to say about their bodies and their state of mind and then, as treatment continues, help the patient to understand how and why certain diseases may have manifested within their bodies and how changing lifestyle, diet and using various remedies will help them to make positive changes with their health. Naturopathic health care is for those who want to take control of their lives and their health. It is for those who want to understand which actions and attitudes contribute to better health.

A Naturopathic Doctor Will Use Many Healing Modalities

Your Naturopathic doctor can draw from a wide range of therapies, and will develop a program specially designed for you. The most common modalities, which may be used individually or in combination, are described below:

Clinical Nutrition

There is an intrinsic relationship between nutrition and wellness. Naturopathic practitioners deal with a wide range of problems relating to nutrition, including factors that interfere with the body's absorption and utilization of nutrients and the diagnosis and treatment of numerous conditions that result from inadequate or defective nutrition. Dietary modifications, nutritional supplementation and detoxification can dramatically improve one's health.

Botanical Medicine

Medicines derived from plants and other natural sources have been used for centuries in the treatment and prevention of disease and for maintaining a state of well being and are the subject of a growing number of clinical research studies. While the active ingredients of some plant medicines are extremely powerful, they are safe and highly effective when administered by a trained Naturopathic Doctor. Your naturopathic doctor may use more than one at a time, since in many cases the healing effects of these remedies in combination are greater than the sum of their individual actions.

Traditional Chinese Medicine and Acupuncture

Chinese pulse and tongue diagnosis, acupuncture and the use of Eastern botanical medicines comprise oriental Medicine, a system of health care that has been used effectively for thousands of years in Asia, but which has only been introduced to North America in the 20th century. Since its introduction Naturopathic practitioners have used needle acupuncture and Eastern botanicals as a traditional part of Naturopathic practice. Acupuncture has been tested clinically in the treatment of chronic pain and in the weaning from addictive substances such as nicotine, caffeine and many drugs.

Homeopathic Medicine

Originally developed during the 18th century by the physician Hahnemann, homeopathic medicine uses very dilute botanical, mineral or other substances to treat specific ailments. If a homeopathic remedy is indicated, your Naturopathic Doctor will select the appropriate formulation from the thousands of homeopathic remedies available, based on your total symptom picture.

Lifestyle Counselling

The roots of Naturopathy lie in the Natural Hygiene movement, which was popular in North America in the 1800's. The corner stones of preventive health care are clean air, clean water, exercise, healthy foods and freedom from excess stress. Naturopathic Practitioners are committed to the education and guidance of their patients in making positive changes to various parts of their current lifestyle that may be inhibiting total health and wellness. Whatever your diagnosis, you can expect to receive some lifestyle counselling every time you visit a Naturopathic Doctor, since prevention is a great part of Naturopathic philosophy and fundamental to the maintenance of good health! Remember, "an ounce of prevention is worth a pound of cure!"

Who Can Be Helped With Naturopathic Medicine?

A Naturopathic doctor is a primary care physician and patients of every age and every stage of life have been helped with Naturopathic care. Many patients present with long standing, chronic conditions such as skin diseases, respiratory diseases, female disorders or gastrointestinal diseases and find much relief with the treatment plans that are available to them. Many patients present with distressing acute illnesses, which can be quickly improved to help avoid pain, loss of sleep, loss of work, and anxiety. Many patients seek a naturopathic doctor for education and prevention; you don't have to be sick to feel better. A Naturopathic program is looking toward the future. You can begin to feel better now and you can reduce the likelihood of suffering and illness later in life.

How are Naturopathic Doctors Trained?

Naturopathic Doctors must study at least 7 years to become eligible to practice in Ontario, and follow the same University pre-medical education as is received by all doctors. The Naturopathic portion of the program comprises 4 years (over 4,500 hours) of dedicated training leading to a Doctorate of Naturopathic Medicine from an approved institution, with over 1,200 hours of supervised clinical experience at the colleges out patient clinic. There are five institutions in the United States and one in Canada that offers approved naturopathic education. Graduates of the comprehensive 4-year training at the Canadian College of Naturopathic Medicine practice throughout Canada and the world.

What Can I Expect During A Visit to a Naturopathic Doctor?

On the first visit the Naturopathic doctor will take an in-depth history, do a complaint oriented physical examination and may use information from laboratory tests to make an assessment and diagnosis. First visits usually last approximately 1 ½ hours. Together with your input a treatment plan is formulated. It is very important that goals are set together so that the patient is comfortable with the Naturopathic Doctor's recommendations. Subsequent or follow up visits will follow the treatment plan and address new concerns that arise in the patient's life. Follow up visits usually last 20-30 minutes. If a course of acupuncture is recommended, a series of eight appointments over 4 weeks will likely be scheduled. These visits usually last for approximately 30-45 minutes.

REASON FOR REFERRAL OR PRESENTING CONCERN

Please fill out the following chart regarding your health concerns which have brought you to our clinic today.

Chief Concern	How long has it been going on?	What makes it feel better?	What makes it feel worse?	How has it been treated so far?
1.				
2.				
3.				

Concern 1.

Has the patient seen a medical doctor about this condition? Yes No If YES, when? _____

If No, why not? _____

Have you been given a medical diagnosis? Yes No If yes, what was the diagnosis? _____

Who made the diagnosis? _____ Was a treatment plan recommended? Yes No

If Yes, did you follow the plan? Yes No If yes, was the treatment successful? Yes No

Concern 2.

Has the patient seen a medical doctor about this condition? Yes No If YES, when? _____

If No, why not? _____

Have you been given a medical diagnosis? Yes No If yes, what was the diagnosis? _____

Who made the diagnosis? _____ Was a treatment plan recommended? Yes No

If Yes, did you follow the plan? Yes No If yes, was the treatment successful? Yes No

Concern 3.

Has the patient seen a medical doctor about this condition? Yes No If YES, when? _____

If No, why not? _____

Have you been given a medical diagnosis? Yes No If yes, what was the diagnosis? _____

Who made the diagnosis? _____ Was a treatment plan recommended? Yes No

If Yes, did you follow the plan? Yes No If yes, was the treatment successful? Yes No

Please list any other concerns you would like to discuss with the doctor: _____

CURRENT HEALTH STATUS

How would you rate your child's health? Excellent Good Fair Poor

Sleep Patterns

Where does this child sleep? Own room Parents Room Other _____

Child's sleep patterns (first year) _____

Current sleep patterns? _____

Does your child nap during the day? If yes, when is the nap taken and for how long? _____

Is there any history of bedwetting? Yes No If so, what was your response? _____

What position does your child sleep in? (eg. On back, right side) _____

As an infant what position did your child sleep in? _____

Bed time and waking time of the child currently: _____

Does your child sweat a lot in bed? Yes No What parts of the body? _____

Odour? Yes No _____

General Behaviour and Emotional Status of Child

Briefly describe your child's behaviours and/or emotional status in the following situations:

At home: _____

At school (e.g. anxiety, separation anxiety, disruptive): _____

Current marital status of parents: _____ Current stability of the home: _____

Please list the people who share their home with this child (ie grandparents, aunt, etc) _____

Relationships with friends, family: _____

What are the ages of the child's siblings? _____

Child's placement in the family? (ie 2nd child) _____

Relationship with siblings: _____

Mother's working hours: _____ Father's working hours: _____

Do you use a nanny or a babysitter? Yes No How often? _____

Who is with your child during the day? _____

How often have you moved since your child was born? _____

Have you noticed any particular time of the day when your child's behaviour is, in general:

Worse? _____ Better? _____

List any of your child's fears or worries: _____

List interests and/or activities your child currently partakes in (e.g. sports, dance lessons) _____

List your child's sensitivities (e.g. hot, cold, bright lights, wool, emotionally): _____

Has your child had any traumatic experiences (e.g. divorce, car accidents)? _____

How does your child respond to discipline? _____

What type of discipline is used in your home? _____

Was your child a quiet or fussy infant? _____

Are there any pets in the household? _____

Are there any smokers in the household? Yes No

How many hours a day does this child get out of doors to play? Summer _____ Winter _____

How many hours, on average, does your child watch television? Per weekday: _____

On Weekends: _____

Does your child use a home computer? Yes No How often? _____

Does your child use video games (X-Box, etc) Yes No How often? _____

Please describe your child's personality: _____

PRENATAL HISTORY

Mother's health at conception: Excellent Good Fair Poor
Age at conception _____ Blood group _____ Rh factor _____
How many pregnancies before this child? _____ How many live births? _____
Was this pregnancy planned? Yes No Desired? Yes No Was this child adopted? Yes No
Did you take prenatal vitamins? (what kind) _____
How would you classify your diet during the pregnancy? fresh and whole foods fast foods
 many cravings frequent use of coffee I was happy with my diet room for improvement
Were there any of the following complications during pregnancy? Nausea and vomiting Bleeding
 Gestational diabetes Toxemia High blood pressure Excessive weight gain
 Medication Alcohol use Recreational drug use Previous infertility
 Swelling Premature labour Excessive mental/ emotional stress
 Smoking/second hand smoke exposure Chemical exposure Accidents/injuries
 Herpes outbreak Thyroid Infections (e.g. yeast) Exposure to a disease (ie toxoplasmosis)
Did you work during your pregnancy? Yes No and if yes, until when? _____
What was your occupation at the time of pregnancy? _____
Did you travel during your pregnancy? Yes No and if yes, where? _____
Please list any non prescription or prescription medications you took while you were pregnant:

What was your overall impression of your pregnancy? _____

BIRTH HISTORY

Pregnancy length (weeks): _____ Labour length _____ Second (pushing) stage length _____
Home birth Hospital birth Midwife G.P. O.B.
Vaginal birth C-Section Pain Meds? Which? _____
Who was present for the delivery? _____
Any complications with the labour or birth? _____
 premature forceps vacuum extraction breech
 epidural blue baby meconium suction required
 premature rupture of membranes prolapsed cord placenta previa
 artificial rupture of membranes abrupto placenta gel induction
 cephalopelvic disproportion (head too big) hemorrhage episiotomy
 failure to progress/stalled labour oxygen required pitocin drip induction
 jaundice post partum depression birth defects
 incubator multiple birth un-descended testes fetal distress
Height at birth: _____ Weight at birth: _____ APGAR Scores: _____
Was Vitamin K administered? No Yes How? by mouth by injection
Was erythromycin administered in the eyes? Yes No
Was silver nitrate administered in the eyes? Yes No
Any adverse reactions: _____
Mother's emotional state at the time of birth? _____

Mother's emotional state post-partum? _____

DEVELOPMENTAL HISTORY

At what age were the following milestones reached?

Smiled _____	Grasped an object _____	Recognized a face _____
Rolled over _____	Sat on own _____	First tooth _____
Crawling _____	Walks on own _____	First word _____
First sentence _____	Scribbling _____	Play Patty Cake _____
Dress themselves _____	Toilet Trained _____	Sleeps in own room _____

Did your child stand up: on own with help?

How was a walker, playpen or jolly jumper used? _____

When did your child first use "I" when referring to him/herself? _____

Physical Growth

Please list the child's height and weight at each of the following ages:

8 weeks _____	6 months _____
1 year _____	2 years _____
3 years _____	4 years _____

DIET

Was this child breast fed? Yes No For how long? _____ on demand on a preset schedule

If not breast fed, why? _____

If not breast fed, what was the first food? _____ Was formula used? Yes No What type? _____

At what age was formula introduced? _____ At what age were solid foods introduced? _____

What were the first three solid foods introduced? _____

Any food restrictions/allergies? _____

If breast fed, at what age was the child weaned? _____

What is the child's appetite like now? _____

Please describe your child's typical daily diet? _____

How much fluids does the child drink per day? _____ What is the preferred fluid? _____

 arthritis tuberculosis cancer allergies
 mental illness asthma eczema alcoholism
 hypoglycemia leukemia drug abuse migraines
 SIDS digestive problems stroke bleeding disorder
 kidney disease anemia epilepsy
 other significant illness: _____

Please find a consent form and a diet diary on the following pages.

NATUROPATHIC MEDICINE INFORMED CONSENT

Naturopathic medicine is, as the name implies, the treatment and prevention of diseases by natural means. Naturopaths assess the whole person, taking into consideration physical, mental, emotional and spiritual aspects of the individual. Gentle, non-invasive techniques are generally used in order to stimulate the body's inherent healing capacity.

A number of different approaches are used. Diet and nutritional supplements, botanical medicine, homeopathy, oriental medicine and acupuncture, hydrotherapy, physical medicine and lifestyle counseling are the mainstays of naturopathic medicine.

Individual diets and nutritional supplements are recommended to address deficiencies, treat disease processes and to promote health. The benefits include increased energy, increased gastrointestinal function, improved immunity and general well being.

Botanical Medicine is the use of herbal teas, tinctures, capsules and other forms of herbal preparations to assist in the recovery from injury and disease. These compounds are also used to boost the body's immune system and prevent disease.

Homeopathy is a form of medicine based on the law of similars - that is the use of tiny doses of the very thing that causes symptoms in healthy people. These minute doses of plant, animal or mineral origin are used to stimulate the body's ability to heal itself. Homeopathy is a powerful tool and effects healing on a physical and emotional level.

Oriental medicine includes acupuncture, as well as the use of botanical formulas and dietary changes to eliminate disease and balance body functions. Acupuncture refers to the insertion of sterilized needles through the skin into underlying tissues at specific points on the surface of the body. Sometimes moxa (a compressed herb in the form of a stick) is burned over an acupuncture point to help relieve symptoms. Botanical formulas may be given in the form of pills, tinctures, extracts or decoctions (strong teas) to be taken internally or used externally as a wash. Herbal formulas may include shell, mineral and animal materials as well as plants. Dietary advice is based on Traditional Chinese medical theory.

Physical medicine refers to the use of hands-on techniques such as soft tissue and spinal manipulation, as well as various types of electrical stimulation and therapeutic ultrasound for the purpose of treating musculoskeletal and neurological problems. Hydrotherapy refers to the use of hot and cold water applications to improve circulation and stimulate the immune system.

As Naturopathic Medicine is a holistic approach to health, ***lifestyle*** is considered relevant to most health problems. Your naturopath will help you to identify risk factors and make recommendations to help you optimize your physical, mental and emotional environment.

Your naturopath will take a thorough case history, do a screening physical examination, which could include a breast exam on females, and request bloodwork and urine tests as needed. If your case requires, the physical may include more specific examinations such as gynecological, rectal, prostate or genital exams or your naturopath may request you visit your medical doctor for such exams.

Even the gentlest therapies have their complications, especially in certain physiological conditions such as pregnancy and lactation, or in very young children. Some therapies must be used with caution in certain diseases such as diabetes, heart, liver or kidney disease. It is very important therefore that you inform your practitioner immediately of any disease process that you are suffering from, or if you are pregnant, suspect you are pregnant or you are breast feeding.

PLEASE TURN OVER

There are some health risks to treatment by Naturopathic Medicine. These include, but are not limited to:

- Aggravation of pre-existing symptoms;
- Allergic reactions to supplements or herbs;
- Pain, bruising or injury from venipuncture, intramuscular injections or acupuncture;
- Fainting or puncturing of an organ with acupuncture needles, accidental burning of skin from the use of moxa;

I understand that a record will be kept of the health services provided to me. This record will be kept confidential and will not be released to others unless so directed by myself or my representative or unless it is required by law. I understand that I may look at my record at anytime and can request a copy of it by paying the appropriate fee. I understand that information from my record may be analyzed for research purposes, and that my identity will be protected and kept confidential. I understand that the naturopath will answer any questions I have to the best of her/his ability.

I understand that results are not guaranteed. I do not expect the naturopath to be able to anticipate and explain all risks and complications. I will rely on her/him to exercise judgment during the course of the procedure which she/he feels at the time is in my best interests, based upon the facts then known.

I have read the above information and with this knowledge, I voluntarily consent to the diagnostic and therapeutic procedures mentioned above, except for: (please list exceptions)

I intend this consent form to cover the entire course of treatment for my present condition. I understand that I am free to withdraw my consent and to discontinue participation in these procedures at any time.
